

THE FUN BEGINS JUNE 12!

STARRING ALL THAT'S SUPER ABOUT SCIENCE

Does your child dream of becoming an astronaut, engineer or naturalist? Then you're in the right place! Blast off with us this summer for a 10-week journey of science discovery, bonkers experiments, and all kinds of cool facts and secrets about history, science and mother nature. Dig in from the rocky Earth's core to the deep depths of our solar system with everything in between!

Each week is themed and filled with fun, hands-on activities featuring incredible science facts about the way our natural world works. We don't want to give it all away just yet, but here's a sneak peek of what our professional teachers are working on!

★ Plants

Prep and plant in the garden just in time for the growing season. Explore the different parts of plants and how to propagate and grow a variety of plants.

★ Bugs

Do you know the different types of insects that help and hurt the garden? Learn to tell them apart and the life cycles of all kinds of bugs.

★ Warm-blooded Animals

Uncover curious critters and learn characteristics and habitats of our furry and spiny mammal friends, where they live and what they like to eat.

★ Cold-blooded Animals

Join our Racine Zoo visitors and zoom in on habitats of cold-blooded creatures, how they eat and survive in different climates.

★ Weather

Discover all kinds of wacky weather systems around the world and how we measure weather, temperature, rainfall, wind speed using our own weather station.

★ Rocks

Everywhere we go, we see rocks, but not all rocks are the same. Dig into geography and diverse landscapes, working with geodes and gem stones.

★ Water

Water is as important as the sun for survival on Earth. Learn all about the water cycle and all the awesome things water can do for us. Prepare to get wet!

★ Space

Explore the final frontier with the help of the international space station and front row seats using the Webb and Hubble telescope!

★ Simple Machines

For thousands of years simple machines have been used to create just about anything. Learn about how the wheel and axle, pulley, inclined plane, screw, wedge and levers still get the job done today.

Force and Power

★ Observe how natural forces function and generate electricity in homes and business. Ramp up in fun activities using gravity, magnets, wind, and solar power.

Early Bird Registration

(before June 1)

\$50 PER CHILD

Summer Registration

(after June 1)

\$75 PER CHILD

The Early Childhood Educational Center (ECEC) is a micro center founded on custom-designed programs consisting of activities and projects geared toward each child's ability. We offer a higher standard of preschool education and quality child care to the Oak Creek community. Specializing in pre-K, 3K and 4K education, our programs encourage socialization, communication and academic skills for the primary school years.

Early Childhood Educational Center
